

What is claimed is :

1. A mophead comprising a holder, flexible absorbent mop material held
by the holder, and a cleaning implement which is independent of the mop
5 material and which is one of permanently attached and disengageably
attachable to the holder at a position adjacent to the outside of the mop
material.
2. A mophead as claimed in claim 1, wherein, when the cleaning
implement is permanently attached, the cleaning implement is unitarily formed
10 as part of the holder.
3. A mophead as claimed in claim 1, wherein, when the cleaning
implement is permanently attached, the cleaning implement is fastened to the
holder using a non-releasable fastening.
4. A mophead as claimed in claim 3, wherein the non-releasable fastening
15 is stitching, bonding, welding, and/or riveting.
5. A mophead as claimed in claim 2, wherein the cleaning implement is
one of an abrasive pad and a scraper and a brush and a combination thereof.
6. A mophead as claimed in claim 1, wherein the cleaning implement is
one of positioned and postionable on an edge of the holder.
- 20 7. A mophead as claimed in claim 1, wherein two said cleaning
implements are provided.
8. A cleaning implement for use with a mophead as claimed in claim 1,
when the cleaning implement is releasably attachable to the holder, the

cleaning implement including at least part of a retaining mechanism by which the cleaning implement is engageable with the holder of the mophead.

9. A cleaning implement as claimed in claim 8, further including one of an abrasive pad and a scraper and a brush and a combination thereof.
- 5 10. A cleaning implement as claimed in claim 9, wherein, when the cleaning implement is multi-functional, the cleaning implement is reversible.
11. A cleaning implement as claimed in claim 8, wherein the said part of the retaining mechanism includes a channel element by which the cleaning implement is push-fit engageable with the holder.
- 10 12. A cleaning implement as claimed in claim 11, wherein the said part of the retaining mechanism further includes a shoulder formed in the channel element for engagement with the holder of the mophead.
13. A cleaning implement as claimed in claim 11, wherein the said part of the retaining mechanism further includes at least one slot formed in the channel
15 element to enable engagement with the holder of the mophead.
14. A mophead in combination with a cleaning implement as claimed in claim 8, wherein the retaining mechanism further includes at least one catch element formed on the holder of the mophead to enable engagement with the channel element of the cleaning implement.
- 20 15. A mophead as claimed in claim 1, wherein the mop material is a bundle of flexible strands.
16. A mophead as claimed in claim 1, wherein the mop material is one of a sheet and sheets of flexible absorbent material.

17. A mophead as claimed in claim 1, in combination with a mop wringer.
18. A mophead as claimed in claim 1, in combination with a cleaning liquid container.
19. A combination as claimed in claim 18, wherein the container includes a
5 mop wringer.
20. A mop having a mophead as claimed in claim 1.
